

Rainbow Rockers Curling League

Leads:

Let your teammates clear the rocks out of the house at the end of each end, while you find your lead rock and get prepared in the hack.

Also, when it's time for skip's rocks, make sure your skip's rock is waiting at the hack.

Skips:

Assume your opponent's rock will be placed as called by the opposing skip, and think of the shot you want to play next as the opponent's rock is in motion. You can always change your mind once you see the exact placement of that rock.

Sweepers:

Remember to walk back down the ice in single file after you finish sweeping, so as not to obstruct the next person's shot.

2nds & 3rds:

Get in the hack, and clean your rock WHILE your opponent's rock is still in motion. This way your are ready to look up to see your skip's call for your shot, after the opponent's rock comes to a halt.

**Let's minimise slow play, and attempt to
play all 8 ends.**

Thank You !
